The journal reports results achieved in addition to proposals for new ways of looking at AI problems, both of which must include demonstrations of value and effectiveness. \u003c/p\u003e\u003cp\u003e Papers describing applications of AI are also welcome, but the focus should be on how new and novel AI methods advance performance in application areas, rather than a presentation of yet another application of conventional AI methods. Papers on applications should describe a principled solution, emphasize its novelty, and present an indepth evaluation of the AI techniques being exploited.\u003c/p\u003e\u003cp\u003e Apart from regular papers, the journal also accepts Research Notes, Research Field Reviews, Position Papers, and Book Reviews (see details below). The journal will also consider summary papers that describe challenges and competitions from various areas of AI. Such papers should motivate and describe the competition design as well as report and interpret competition results, with an emphasis on insights that are of value beyond the competition (series) itself. \u003c/p\u003e\u003cp\u003e From time to time, there are special issues devoted to a particular topic. Such special issues must always have open calls-for-papers. Guidance on the submission of proposals for special issues, as well as other material for authors and reviewers can be found at \u003ca href=http://aij.ijcai.org/special-issues rel=external target=_blank\u003ehttp://aij.ijcai.org/special-issues\u003c/a\u003e. \u003c/p\u003e\u003cp\u003e \u003cb\u003eTypes of Papers \u003c/b\u003e\u003c/p\u003e\u003cp\u003e\u003cb\u003e Regular Papers \u003c/b\u003e\u003c/p\u003e\u003cp\u003e AIJ welcomes basic and applied papers describing mature, complete, and novel research that articulate methods for, and provide insight into artificial intelligence and the production of artificial intelligent systems. The question of whether a paper is mature, complete and novel is ultimately determined by reviewers and editors on a case-bycase basis. Generally, a paper should include a convincing motivational discussion, articulate the relevance of the research to Artificial Intelligence, clarify what is new and different, anticipate the scientific impact of the work, include all relevant proofs and/or experimental data, and provide a thorough discussion of connections with the existing literature. A prerequisite for the novelty of a paper is that the results it describes have not been previously published by other authors and have not been previously published by the same authors in any archival journal. In particular, a previous conference publication by the same authors does not disqualify a submission on the grounds of novelty. However, it is rarely the case that conference papers satisfy the completeness criterion without further elaboration. Indeed, even prize-winning papers from major conferences often undergo major revision following referee comments, before being accepted to AIJ. \u003c/p\u003e\u003cp\u003e \u003ci\u003eAIJ\u003c/i\u003e caters to a broad readership. Papers that are heavily mathematical in content are welcome but should include a less technical high-level motivation and introduction that is accessible to a wide audience and explanatory commentary throughout the paper. Papers that are only purely mathematical in nature, without demonstrated applicability to artificial intelligence problems may be returned. A discussion of the work's implications on the production of artificial intelligent systems is normally expected. \u003c/p\u003e\u003cp\u003e There is no rest

riction on the length of submitted manuscripts. However, authors should note that public ation of lengthy papers, typically greater than forty pages, is often significantly dela yed, as the length of the paper acts as a disincentive to the reviewer to undertake the review process. Unedited theses are acceptable only in exceptional circumstances. Editi ng a thesis into a journal article is the author's responsibility, not the reviewers'. \u003c/p\u003e\u003cp\u003e \u003cb\u003eResearch Notes \u003c/b\u003e\u003c/p\u003e\u0 03cp\u003e The Research Notes section of the Journal of Artificial Intelligence will pro vide a forum for short communications that cannot fit within the other paper categories. The maximum length should not exceed 4500 words (typically a paper with 5 to 14 pages). Some examples of suitable Research Notes include, but are not limited to the following: crisp and highly focused technical research aimed at other specialists; a detailed expo sition of a relevant theorem or an experimental result; an erratum note that addresses a nd revises earlier results appearing in the journal; an extension or addendum to an earl ier published paper that presents additional experimental or theoretical results. \u003 c/p\u003e\u003cp\u003e \u003cb\u003eReviews\u003c/b\u003e \u003c/p\u003e\u003cp\u003e The AIJ invests significant effort in assessing and publishing scholarly papers that pr ovide broad and principled reviews of important existing and emerging research areas, re views of topical and timely books related to AI, and substantial, but perhaps controvers ial position papers (so-called \"Turing Tape\" papers) that articulate scientific or soc ial issues of interest in the AI research community. \u003c/p\u003e\u003cp\u003e \u003cb \u003eResearch Field Reviews:\u003c/b\u003e AIJ expects broad coverage of an established or emerging research area, and the articulation of a comprehensive framework that demon strates the role of existing results, and synthesizes a position on the potential value and possible new research directions. A list of papers in an area, coupled with a summ ary of their contributions is not sufficient. Overall, a field review article must provi de a scholarly overview that facilitates deeper understanding of a research area. The se lection of work covered in a field article should be based on clearly stated, rational c riteria that are acceptable to the respective research community within AI; it must be f ree from personal or idiosyncratic bias. \u003c/p\u003e\u003cp\u003e Research Field Revi ews are by invitation only, where authors can then submit a 2-page proposal of a Researc h Field Review for confirmation by the special editors. The 2-page proposal should inclu de a convincing motivational discussion, articulate the relevance of the research to art ificial intelligence, clarify what is new and different from other surveys available in the literature, anticipate the scientific impact of the proposed work, and provide evid ence that authors are authoritative researchers in the area of the proposed Research Fie ld Review. Upon confirmation of the 2-page proposal, the full Invited Research Field Rev iews can then be submitted and then undergoes the same review process as regular papers. \u003c/p\u003e\u003cp\u003e \u003cb\u003eBook Reviews: \u003c/b\u003eWe seek reviewers for books received, and suggestions for books to be reviewed. In the case of the forme r, the review editors solicit reviews from researchers assessed to be expert in the fiel d of the book. In the case of the latter, the review editors can either assess the rele vance of a particular suggestion, or even arrange for the refereeing of a submitted draf t review. \u003c/p\u003e\u003cp\u003e \u003cb\u003ePosition Papers\u003c/b\u003e: The la st review category, named in honour of Alan Turing as a \"Turing Tapes\" section of AIJ, seeks clearly written and scholarly papers on potentially controversial topics, whose a uthors present professional and mature positions on all variety of methodological, scien tific, and social aspects of AI. Turing Tape papers typically provide more personal per spectives on important issues, with the intent to catalyze scholarly discussion. \u003c/ p\u003e\u003cp\u003e Turing Tape papers are by invitation only, where authors can then s ubmit a 2-page proposal of a Turing Tape paper for confirmation by the special editors. The 2-page proposal should include a convincing motivational discussion, articulate the relevance to artificial intelligence, clarify the originality of the position, and prov ide evidence that authors are authoritative researchers in the area on which they are ex pressing the position. Upon confirmation of the 2-page proposal, the full Turing Tape pa per can then be submitted and then undergoes the same review process as regular papers. \u003c/p\u003e\u003cp\u003e \u003cb\u003eCompetition Papers \u003c/b\u003e\u003c/p\u003 e\u003cp\u003eCompetitions between AI systems are now well established (e.g. in speech a nd language, planning, auctions, games, to name a few). The scientific contributions ass ociated with the systems entered in these competitions are routinely submitted as resear ch papers to conferences and journals. However, it has been more difficult to find suita ble venues for papers summarizing the objectives, results, and major innovations of a co mpetition. For this purpose, AIJ has established the category of competition summary pap ers. \u003c/p\u003e\u003cp\u003e Competition Paper submissions should describe the compe tition, its criteria, why it is interesting to the AI research community, the results (i ncluding how they compare to previous rounds, if appropriate), in addition to giving a s ummary of the main technical contributions to the field manifested in systems participat

ing in the competition. Papers may be supplemented by online appendices giving details o
f participants, problem statements, test scores, and even competition-related software.
\u003c/p\u003e\u003cp\u003e Although Competition Papers serve as an archival record of
a competition, it is critical that they make clear why the competition's problems are r
elevant to continued progress in the area, what progress has been made since the previou
s competition, if applicable, and what were the most significant technical advances refl
ected in the competition results. The exposition should be accessible to a broad AI audi
ence.\u003c/p\u003e","description":"The journal of Artificial Intelligence (AIJ) welcom
